

Exposure

Commercial continues to be the footprints of America
the power of the dollar is the hidden ingredient of all
every circle has hidden paraphernalia -

sovereign secrets in our sophisticated society
regardless relations your flaws
no better then mines in efforts of sobriety -

we are taught decrees to be socially accepted
heavy elution's of morals & ethics so double standards
of money & power can be socially injected -

business should never author or define the truth
nor should profits play apart in our judicial communities
tainted case numbers are filling the holes redefining the loops -

poison is poison burning holes in our stomach linings
conversations of equality means nothing
when double standards are multiplying -

controlled epidemics are like a gold rush
alcohol tobacco narcotics now politics the next phenomenon
sweeping through the nation with 100 mph tornado like wind gust -

I'm talking insider trading that Bloomberg material
I'm talking ringing the Stock Exchange bell
potentially eight plus figures even though its lyrical -
hip hop is profitable shorting or going long
we're natural resources a commodity
to answer Marvin Gayes question of "What's going on" -

they say kings & queens defines prestige & elevation
however as pawns & knights we've grown to understand
our worth so we align corporate & street affiliations -

I'm talking triple fours Hova deep beyond closure
mentally rich trying to let my net worth catch up
so its time the streets & the game give **Oyez22** some exposure -
